CIBES LIFT PRODUCT GUIDE – Platform and cabin lifts
Accessibility solutions for public and commercial buildings

Cibes Lift has been in business since 1947 and is the market leader of screw-driven platform and cabin lifts. We offer you a wide range of lift models, sizes and design choices to meet the needs of architects, contractors and most importantly, lift users. Our lifts are known for their reliability, attractive design and user-friendliness, which makes them perfect for public environments.

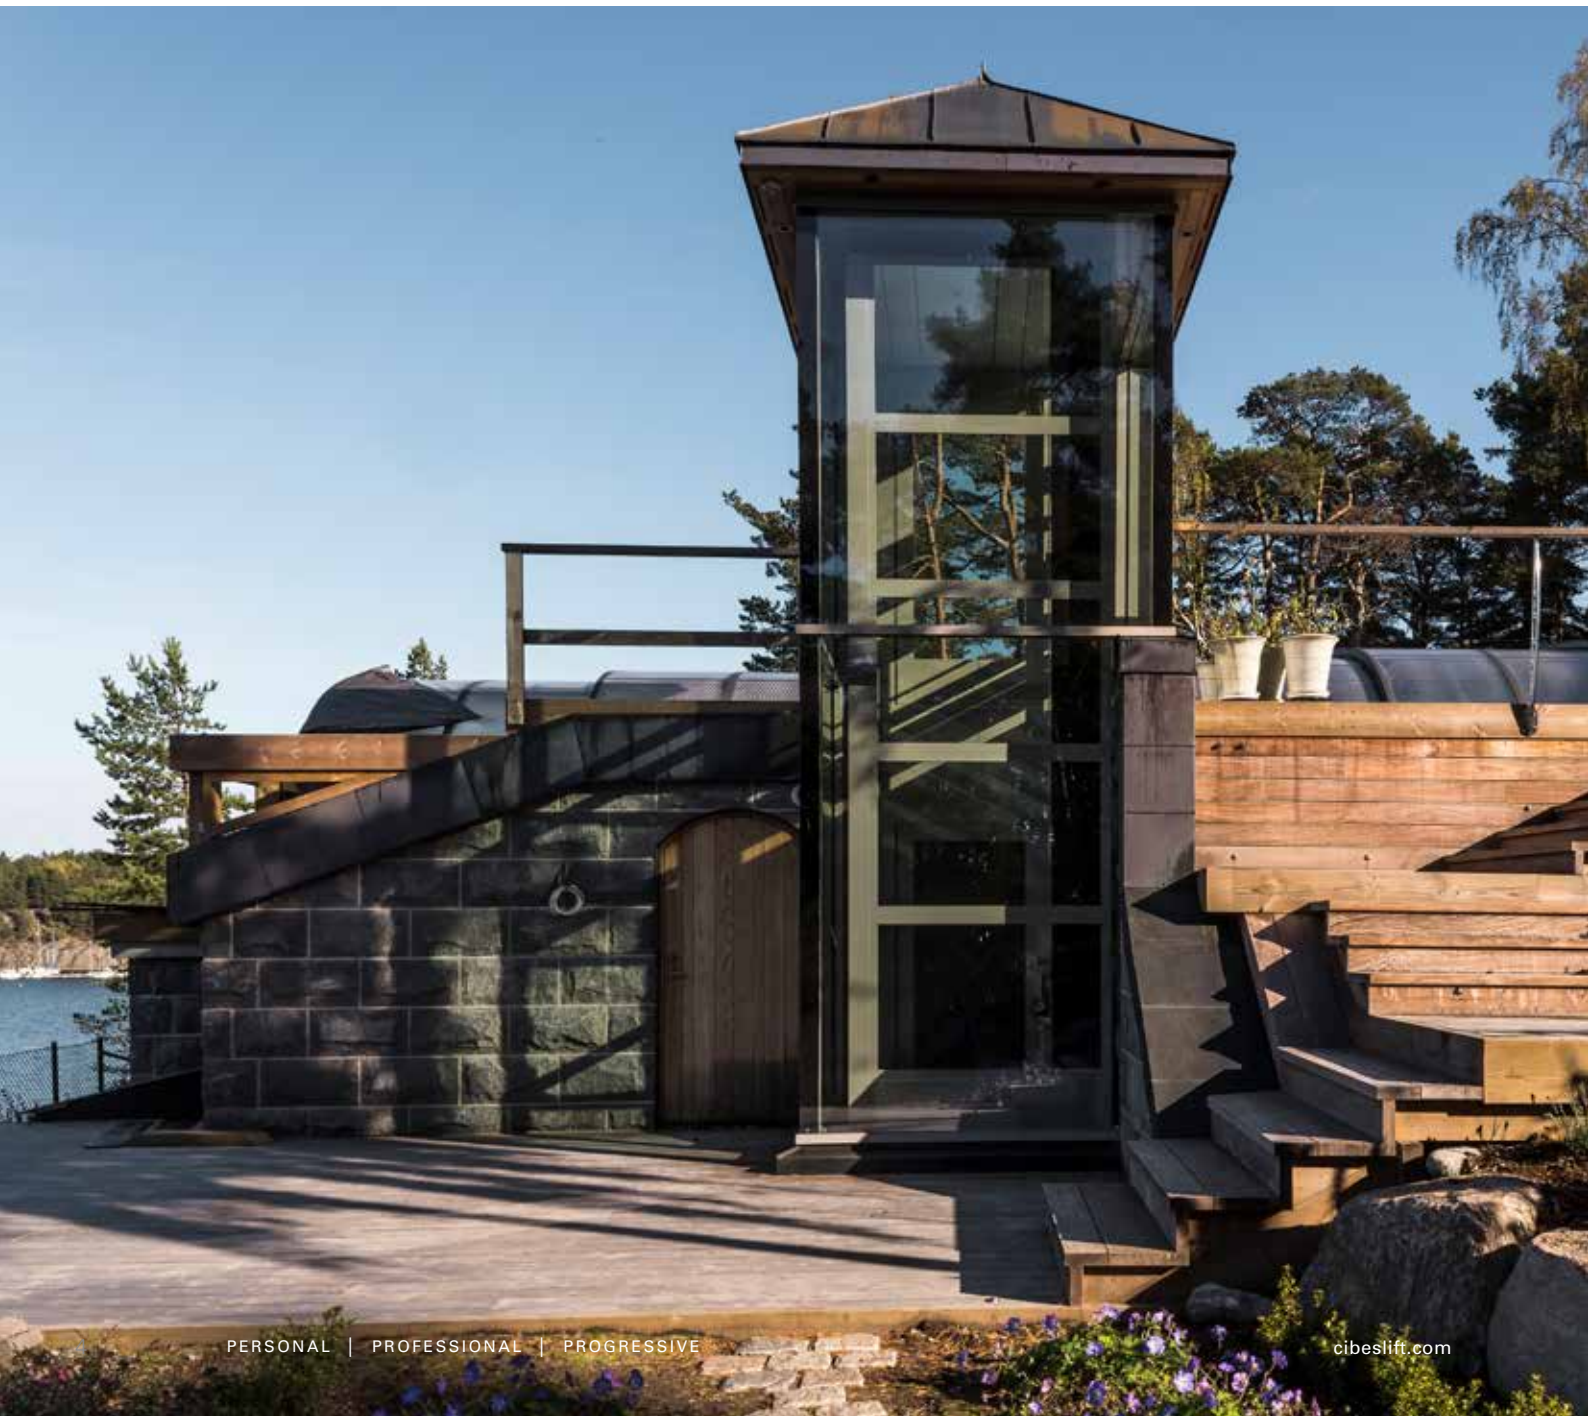

Cibes lift solutions are flexible in terms of sizes and design choices. The space-saving lift construction and our timeless Scandinavian design will adapt to any architectural style.

flexible & **MODERN**

intelligent **DESIGN**

Cibes lift solutions are prefabricated and so ingeniously constructed that they have minimal impact on your building. All lifts are delivered with everything you need, including doors and, for most models, even a ready-made lift shaft in steel or glass.

Safe and user-friendly

Installation and service are key to lift safety. This is why all certified Cibes dealers are trained to install and maintain our lifts. Your Cibes lift is a safe product, as long as you follow the instructions in our user manual. The number of service visits per year depends on the frequency of use, but a lift from Cibes always requires less maintenance than a conventional lift.

Made in Sweden

Cibes Lift is a world-leading manufacturer of screw-driven platform and cabin lift solutions for private and public settings. Our head office, factory and R&D department are located in Sweden, a country known for its smart, high-quality products and environmental awareness.

OPEN up your space

Glass creates an open and airy space. Cibes platform lifts can be glazed on all sides for a 360 degree panoramic view, which is quite unique.

The space saving footprint and 360 degree panoramic glazing of the lift shaft make Cibes lifts fit in any building. With a lifetime of at least 25 years and Energy Label A, a lift from Cibes is a very cost-efficient investment.

Cibes lift solution

- Fast and easy to install
- Reliable drive system – 100% electric
- A cost-efficient alternative to conventional lifts
- Many exclusive design options
- Quality product from Sweden

A fully glazed lift shaft looks spectacular but also makes the most of the light. The lift shaft is complimented by doors with panoramic glazing.

cabin lifts for open-plan **LIVING**

Cibes cabin lifts combines the advantages of platform lift technology with the comfort of a fully enclosed cabin. Lift operation is automatic and virtually soundless. The LED lit ceiling, control panel and inset mirrors exude timeless elegance.

Design examples

Grey floor in vinyl

Lift car color: ANODIC BRONZE
Floor in vinyl (oak wood)

If you buy a cabin lift from Cibes Lift, you get a high-quality product with the same sense of luxury and comfort as a conventional lift, but at a fraction of the cost. Cibes Lift provides smart, prefabricated cabin lifts that are fast and easy to install without major construction work. The perfect choice for any building.

time to **INSTALL**

Cibes lift solutions can be installed in places where conventional lifts cannot. Cibes platform lifts are extremely compact and have minimal impact on the surrounding building, thanks to the low pit and headroom and the integrated machine room. You do not even have to construct a lift shaft, we deliver it for you!

An outdoor lift preserves the space inside the building and of deck-access walkways.

The ready-made shaft makes it easy to install Cibes lifts in open-plan spaces.

The compact construction fits in the centre of a staircase.

Built-in cabin lift, through floors.

ECO Silent technology

Silence and green energy are highly valued in today's modern architecture. This is why Cibes Lift has developed the ECO Silent System. We believe that our new drive system will revolutionize the way we perceive screw-driven lifts. The ECO Silent system not only makes the operation of our lifts virtually silent. It also makes our lifts much more energy-efficient than other comparable lifts. The ECO Silent System preserves your silence and reduces your power consumption. A perfect solution.

SILENCE
made in sweden

a versatile & smart lift **CONCEPT**

Cibes lift solutions are completely ready-made products, delivered to you in manageable size packages. This makes installation is fast and easy. Lifts from Cibes are cost-efficient and attractive accessibility solutions that suit most environments.

The perfect accessibility solution

No machinery on top, low headroom.
Energy-saving LED lit ceiling.

Shaft panels in steel or in safety glass.
All four sides can be glazed.

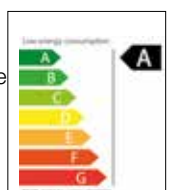

Wide choice of door models; steel doors, aluminium doors, gates, EI60 fire rated doors.

Concealed or externally fitted power door openers as an option.

The Cibes A5000 is designed to have a small footprint and a maximum of space inside.

Cibes lift solutions are eco-friendly. 95% of the lift is made from recyclable materials and the Cibes A5000 has energy efficiency rating A.

alternatives for your COMFORT

A lift is more than an accessibility solution. It can be made into a beautiful architectural feature. Cibes Lift offers you a wide range of design options and accessories that make our lifts fit any project.

Audio-visual aids
4" display level indicators, voice announcement

Mirror glass
Let the light in with glass, tinted or mirror

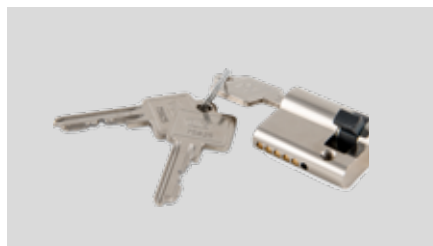

LED light
Lights with long range and brightness

Shaft panels
Choose between steel or glass

Shaft in steel or glass

Locking systems
Control the access to your lift

Door options

Call buttons on the door or remote

Step by step all the way to installation

Advice and support

Step 1: Personal advice for your project by your certified Cibes dealer.
 Step 2: Fast delivery and installation by your certified Cibes dealer.
 Step 3: Service provided by your certified Cibes dealer.

Quality installation

Your Cibes dealer can visit the installation site in order to find the best lift solution for you.

You do not need to make any major structural alterations. Installation can be executed in 2-3 days.

Service

Our screw-driven technology is simple and robust and our lifts are low-maintenance. Nevertheless, it is important to keep your lift in good order. Therefore, we always recommend that you sign a service contract with your local Cibes dealer.

Day 1 - Installation starts

The bottom frame, guides and platform are installed. The platform lift can be installed with or without a lift pit.

Day 2 - Installation continues

The doors, shaft and platform cladding are installed, all electrics are plug & play and easy to connect.

Day 3 - Finish

The finishing touches are applied and all functions of the lift are tested. Your lift is now ready to use.

ACCESS CONFIGURATION

1. Single entry (2 stops)

2. Open-through (3 stops)

FLEXIBLE CONFIGURATION
 Cibes Lift offers a great choice of lift sizes, door models, finishes and accessories so that you can adapt the lift configuration to your taste and requirements.

design FREEDOM

Cibes Lift offers perfect accessibility solutions for all kinds of settings: public, commercial and private.

All Cibes lift models carry the CE mark and go through extensive testing and quality checks before leaving our factory. Our lifts are Certified products that comply with European quality standards, Machinery Directive 2006/42/EC and EN 81-41. This product information is general and we reserve the right to modify product design and specifications. Minor deviations in color reproduction can occur.
